Errata Sheet for the Version Description Document for the Kernel Patch 4 (HP-UX 10.20)

This is an errata sheet for the *Defense Information Infrastructure (DII) Common Operating Environment (COE) Version 3.0.1.0 Version Description Document for the Kernel Patch 4 (HP-UX 10.20)*, document number DII.3010.HP1020.KernelP4.VDD-1, August 27, 1997.

This errata sheet reissues Section 3.2, *Software Changes*, of the Version Description Document to correct the table of software changes. Specifically, the table has been updated to indicate that INRI Number RTO00001554 has an Agency Number of D70605.

3.2   Software Changes

Refer to the following table for a list of software changes for the DII COE Version 3.0.0.3 Kernel Patch 6 (Solaris 2.5.1). The software changes are listed in order of INRI Number.

DII COE Version 3.0.1.0 Kernel Patch 4 (HP-UX 10.20) Software Changes
Total Software Changes: [3]
INRI Number: RTO00001539 **Agency Number**: D70341 **Short Description**: Patch segments cannot be installed from the network. **Long Description**: Patch segments can be installed from tape but not from the network (NETWORK option in the Select Source window, Device panel). When attempting to install a patch from the network, the following error message appears: "Unable to get [VERSION] descriptor information. Couldn't get the patch number".
INRI Number: RTO00001554 **Agency Number**: D70605 **Short Description**: The Process Manager does not run logout processes upon logout. **Long Description**: The Process Manager does not run the commands in the session logout file upon logout. Instead, the commands are being run at the next login. This problem was tested as a basic JMCIS user. This problem has no workaround.

DII COE Version 3.0.1.0 Kernel Patch 4 (HP-UX 10.20) Software Changes

INRI Number: RTO00001839

Agency Number: D70551

Short Description: The ReqrdScripts fails to update the .../global/Profiles/<account group default when a new segment is loaded.

Long Description: The ReqrdScripts fails to update the .../global/Profiles/<account group default when a new segment is loaded. However, it update the local/Profiles directory. This problem prevents an account group environment from being extended. Since the SA and SSO account groups cannot be modified, the extentions must be placed in the appropriate profiles directory.

Workaround: Source the /h/AcctGrp/<account group>/Scripts.cshrc.<extension> files instead. The global profiles then work since the SegInfo directive causes this area to be properly updated.

NOTE: GSPR D70551 has been addressed for Security Administration and System Administration account groups. See Section 6, *Release Notes*, for details on how to extend the environment for global profiles with other account group types.
